

Thank you for purchasing!

Ever needed high quality roman columns for your games? Look no further! Small pack that can be used with ancient architecture/ruins as well as neoclassical urban scenes.

Features:

Update v1.1:

- Previously just 3 column models, now comes with more additional models and much more at almost the same price!
 - Roughly 66 prefabs
 - 3 to 4 LOD levels counting LOD0
 - Color and weathering variations
 - 2K and up to 4k texture atlases
 - 6 new tile textures
 - Additional detail normal maps
- One modular example level with Unity terrain
 - New example scenes
- PBR specular material library with new specular textures and roughness maps
 - One custom LUT texture for unity5 post processing stack
 - One grass mesh and terrain grass
